

Cloning and Mutagenesis

Recombinant DNA Cloning
Sub-Cloning
Expression Vectors/Constructs
Affinity Tagging
Fluorescent Protein Fusion
Site Directed Mutagenesis

Expression

Native and Non-Native Expression
Inclusion Body Preparation
Refolding
Bacteria
Yeast
Mammalian Cells
Insect Cells

Assays

Viral Plaque Assays
Immuno-Affinity Assays
Enzyme Kinetics

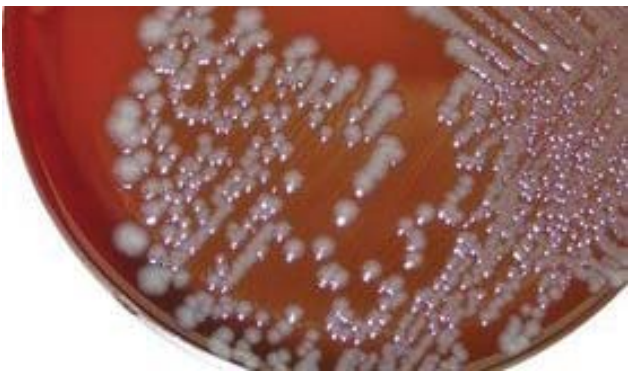

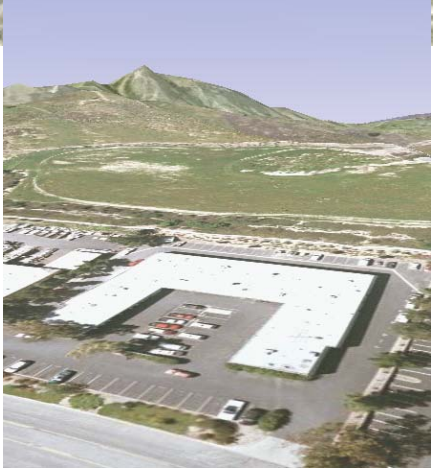

Purification

Proteins
Antibodies
Genomic and Plasmid DNA

Synthesis

Custom Affinity Resins
Peptides
Polymers
Custom PEGs

Time is money and in the rapidly growing field of biotechnology time can mean the difference between success and failure. At Vector Research our goal is to provide assistance with your research and development to help you more rapidly achieve success. We provide services for the little things like preparation of plasmid DNA and site directed mutagenesis so that you have more time to focus on the long term goals of your research. Plus, our scientists have significant experience in all areas of molecular biology and protein biochemistry so that we can help you with more extensive research and development too. Our services include cloning, mutagenesis, and protein expression and purification. So, whatever your research needs may be, at Vector Research we would like to help!
